

Managing Cyber Security, by CISI

The severe threat of malicious activity such as hacking, defamation of privacy and denial-of-service attacks are becoming more recognised – firms of all size are raising security measures and adapting their internal systems to ensure they are integrating the latest cyber threat intelligence.

Managing Cyber Security, based on the CISI syllabus, will provide participants with a basic knowledge of the threat of cyber crime. They will be able to evaluate the risks to the financial services industry, and develop effective security solutions to prevent, detect and mitigate cyber attacks.

By completing the program and earning your certificate, you will:

- Gain a fundamental framework and knowledge of investment industry
- Stand out from the crowd in a competitive global job market
- Improve your job performance by gaining an understanding of common global industry standards
- Gain a better understanding of how your role impacts the rest of the business
- Feel more confident working with your colleagues and clients

Who should attend:

The syllabus is primarily intended for non-technical and managerial audiences and is suitable for professionals working within the financial services industry including Compliance officers and Money Laundering Reporting officers, those involved in operational risk management, audit or IT audit, regulation, law enforcement, trade and commerce and individuals from bi-lateral development institutions and civil society organisations.

What will be taught

- The Background and Nature of Cybercrime
- The Legislative Environment
- The Public-Private Interface
- Cybercrime and the Financial Services Industry
- Combating Cybercrime
- Trends in Economic Crime Compliance

If you would like to discuss bringing this or another topic to your organization on an in-house basis please call us at 22274470 or email us at info@eimf.eu. To check our full course calendar please visit www.eimf.eu

All participants will be awarded a certificate of attendance. Each hour of attendance will account for one unit of Continuing Professional Development (CPD) as required for members of most professional bodies.

Trainer: Mark Johnson

Mark Johnson originally served as an operational drug enforcement officer and military intelligence officer in the Caribbean and Central America during the 1980s. He then became the Head of Fraud Control for Cable & Wireless plc in London, before moving on to technical security roles within Ericsson and Nortel which saw him working on complex projects and investigations worldwide.

Mark now works as a cybercrime and open source intelligence consultant and trainer to the UK Home Office, the City of London Police, the UK National Police Chief's Council, CISI, WMA, ICA, MISTI, CIFAS and several other organisations. He has previously delivered international engagements for the United Nations and Europol.

Standalone Certificate

Participants can choose to attend the course and will receive a certificate of attendance indicating successful participation indicating topics covered

About the Exam

For participants who choose to take the exam and get the CISI qualification they will need to also register for the exam with CISI.

The qualification is examined via computer based testing and exams take place throughout the year.

The exam consists of 50 multiple choice questions and lasts 1 hour.
